

White Apron

Located in Brea Ca.

White apron is widely known as one of the top meat processors and distributors of fine meats and poultry in California. White Apron has been in business since 1951 and has a reputation for quality. With that being said, equipment purchases must also be of high quality. Today White Apron is using our DC900 vacuum chamber machine. This machine is perfect for their high production needs. Extra large seal bars, wide space between the bars and high dome lid for their large cuts. Also to help speed things up, fully automatic lid transfer for easy use and faster cycling. At one time they were using two machines in the place where only one machine can do the job now. Plant engineer Gehylen says – “The servicing is fast and easy and parts are always available. This machine stays in production 12-16 hours per day, every day. That’s what we call reliable. We were looking for a machine that could allow us to pack large bags and more per cycle. We found that in or Promarks vac packer. We are very pleased and would recommend Promarks equipment to everyone.”
